

Rebuild your home while reducing your impact on the environment.

Turning a loss into a win-win for you and the environment

If you would like to lessen your impact on the environment and go “green” at home, you may be thinking of replacing windows or roofing with energy-efficient options, installing Energy Star-rated appliances, or swapping out your water or light fixtures for low-volume, low-wattage choices. But making environmentally friendly changes like this can get expensive. Especially if you’re already rebuilding after a loss.

Make “green” improvements while rebuilding

If you suffer a covered loss to your home, Chubb's GreenWise Upgrade Coverage helps you renovate or rebuild using energy efficient appliances and eco-friendly building materials.

- Replace damaged or destroyed items with environmentally friendly materials, low-impact processes, and ultra-efficient heating and cooling technologies.
- Choose to rebuild to Leadership in Energy and Environmental Design (LEED) standards, using ENERGY STAR-rated products, or other national or regional “green” building standards or certifications.
- If your home is already “green” certified, meaning it uses materials and practices that are environmentally friendly, you can use the money to upgrade to more rigorous current standards.

Choose the level of protection you want...

With GreenWise Upgrade Coverage, which can be added to your Chubb Homeowner's Policy, you can go as “green” as you want.

- Purchase GreenWise Upgrade limits up to 10%, 25%, 50% or 100% of the amount of coverage on your home.
- If you have a condominium or cooperative, the same options apply, up to the combined amount of coverage you have for contents and additions and alterations.

Let us raise your expectations

Here are just a few reasons to choose Chubb GreenWise Upgrade Coverage:

1. Fast claim service

Contact within 24 hours of loss report.
Payments issued within 48 hours of settlement.
24/7 emergency services available.

2. Environment-friendly

Examples of covered materials include energy-efficient windows and roofing materials, Energy Star appliances, carpets and paints that don't emit volatile organic gases, sustainable hardwoods, low-volume water fixtures, low-wattage light fixtures and certain countertops.

3. LEED the way

Rebuild to Leadership in Energy and Environmental Design standards, with ENERGY STAR-rated products, or a wide variety of other national and regional building standards and certifications.

4. Use an expert

Chubb can refer you to a pre-qualified service provider who is knowledgeable about and consistently uses "green" materials and processes.

5. Go "greener"

Even if your home is already "green", you can use Greenwise Upgrade Coverage claims payment funds to upgrade to more current and stringent energy codes.
