Annual Report 2024

Chubb Insurance Singapore Limited

(Incorporated in Singapore)

Directors' Statement

For the financial year ended 31 December 2024

The directors present their statement to the member together with the audited financial statements of the Company for the financial year ended 31 December 2024.

In the opinion of the directors,

- (a) the financial statements as set out on pages 8 to 76 are drawn up so as to give a true and fair view of the financial position of the Company as at 31 December 2024 and the financial performance, changes in equity and cash flows of the Company for the financial year then ended; and
- (b) at the date of this statement, there are reasonable grounds to believe that the Company will be able to pay its debts as and when they fall due.

Directors

The directors of the Company in office at the date of this statement are as follows:

- Seah Chin Siong (appointed on 11 November 2024)
- · Olivier Bouchard
- Hng Keng Yoong

Arrangements to enable directors to acquire shares and debentures

Neither at the end of nor at any time during the financial year was the Company a party to any arrangement whose object was to enable the directors of the Company to acquire benefits by means of the acquisition of shares in, or debentures of, the Company or any other body corporate.

Directors' Statement (Continued)

For the financial year ended 31 December 2024

Directors' interests in shares or debentures

According to the register of directors' shareholdings, none of the directors holding office at the end of the financial year had any interest in the shares in, or debentures of, the Company or its related corporations, except as follows:

	Holdings registered in the name of director or nominee		
	At 31.12.2024	At 1.1.2024	
Chubb Limited, ultimate holding corporati	ion		
Restricted stock award¹ Olivier Bouchard Hng Keng Yoong	2,766 696	1,789 554	
Restricted stock options ¹ Olivier Bouchard Hng Keng Yoong	14,319 775	13,376 583	
Common shares at par value CHFO.50 each Olivier Bouchard Hng Keng Yoong	10,020 1,511	9,611 1,257	

^{&#}x27;This refers to restricted stock award and stock options granted by Chubb Limited (incorporated in Switzerland) under the Group's 2004 Long-Term Incentive Plans.

Share options

There were no options granted during the financial year to subscribe for unissued shares of the Company.

No shares have been issued during the financial year by virtue of the exercise of options to take up unissued shares of the Company.

There were no unissued shares of the Company under option at the end of the financial year.

Independent auditor

The independent auditor, PricewaterhouseCoopers LLP, has expressed its willingness to accept re-appointment.

On behalf of the directors

Independent Auditor's Report To The Member Of Chubb Insurance Singapore Limited

For the financial year ended 31 December 2024

Report on the Audit of the Financial Statements

Our opinion

In our opinion, the accompanying financial statements of Chubb Insurance Singapore Limited (the "Company") are properly drawn up in accordance with the provisions of the Companies Act 1967 (the "Act") and Financial Reporting Standards in Singapore ("FRSs") so as to give a true and fair view of the financial position of the Company as at 31 December 2024 and of the financial performance, changes in equity and cash flows of the Company for the financial year ended on that date.

What we have audited

The financial statements of the Company comprise:

- the statement of comprehensive income for the year ended 31 December 2024;
- the balance sheet as at 31 December 2024;
- the statement of changes in equity for the financial year then ended;
- the statement of cash flows for the year then ended; and
- the notes to the financial statements, including a summary of material accounting information.

Basis for Opinion

We conducted our audit in accordance with Singapore Standards on Auditing ("SSAs"). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We are independent of the Company in accordance with the Accounting and Corporate Regulatory Authority Code of Professional Conduct and Ethics for Public Accountants and Accounting Entities ("ACRA Code") together with the ethical requirements that are relevant to our audit of the financial statements in Singapore, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ACRA Code.

Other information

Management is responsible for the other information. The other information comprises the Directors' Statement but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Independent Auditor's Report To The Member Of Chubb Insurance Singapore Limited (Continued)

For the financial year ended 31 December 2024

Responsibilities of Management and Directors for the Financial Statements

Management is responsible for the preparation of financial statements that give a true and fair view in accordance with the provisions of the Act and FRSs, and for devising and maintaining a system of internal accounting controls sufficient to provide a reasonable assurance that assets are safeguarded against loss from unauthorised use or disposition; and transactions are properly authorised and that they are recorded as necessary to permit the preparation of true and fair financial statements and to maintain accountability of assets.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The directors' responsibilities include overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SSAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design
 and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to
 provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for
 one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override
 of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Independent Auditor's Report To The Member Of Chubb Insurance Singapore Limited (Continued)

For the financial year ended 31 December 2024

Report on Other Legal and Regulatory Requirements

In our opinion, the accounting and other records required by the Act to be kept by the Company have been properly kept in accordance with the provisions of the Act.

These notes form an integral part of and should be read in conjunction with the accompanying financial statements.

1. General information

Chubb Insurance Singapore Limited (the "Company") is incorporated and domiciled in Singapore. The address of its registered office is 138 Market Street, #11-01 CapitaGreen, Singapore 048946.

The Company is licensed under the Insurance Act 1966 (the "Insurance Act") as a direct general insurer.

The principal activity of the Company consists of underwriting of general insurance including reinsurance of all classes of risks.

2. Summary of material accounting information

(a) Basis of preparation

The financial statements have been prepared in accordance with Singapore Financial Reporting Standards ("FRS"). The financial statements have been prepared under the historical cost convention, except as disclosed in the accounting policies below.

The preparation of these financial statements in conformity with FRS requires management to exercise its judgement in the process of applying the Company's accounting policies. It also requires the use of certain critical accounting estimates and assumptions. The area involving a higher degree of judgement or complexity, or area where estimates and assumptions are significant to the financial statements is the estimation of insurance liabilities and reinsurance assets arising from claims made under insurance contracts, disclosed in Note 3 and Note 12.

Interpretations and amendments to published standards effective in 2024

On 1 January 2024, the Company adopted the new or amended FRS and Interpretations to FRS ("INT FRS") that are mandatory for application from that date. Changes to the Company's accounting policies have been made as required, in accordance with the transitional provisions in the respective FRS and INT FRS.

The adoption of these new or amended FRS and INT FRS did not result in substantial changes to the Company's accounting policies and had no material effect on the amounts reported for the current or prior financial years.

The accompanying notes form an integral part of these financial statements.

For the financial year ended 31 December 2024

2. Summary of material accounting information (continued)

(b) Intangible assets

Distribution rights

Distribution rights acquired are initially recognised at cost and subsequently carried at cost less accumulated amortisation and accumulated impairment losses (Note 2(d)). These costs are amortised to profit or loss using the discounted cashflow approach over the estimated useful life of 20 years.

Computer software

The expenditure capitalised for software under development includes direct costs, direct salaries and overhead costs that are directly attributable to the development of this software.

Once the software under development is available for use, the capitalised development expenditure is transferred to computer software and is recognised at cost less accumulated amortisation and accumulated impairment losses, if any. These costs are amortised to profit or loss using the straight-line method over their estimated useful lives of 3 to 19 years.

(c) Property, plant and equipment

Property, plant and equipment are initially recognised at cost and subsequently carried at cost less accumulated depreciation and accumulated impairment losses (Note 2(d)).

The cost of an item of property, plant and equipment initially recognised includes its purchase price and any cost that is directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. The projected cost of dismantlement, removal or restoration is recognised as part of the cost of property, plant and equipment if such obligation is incurred as a consequence of acquiring or using the asset.

Depreciation is calculated using the straight-line basis to allocate their depreciable amounts over their estimated useful lives as follows:

Leasehold improvements 5 years - 10 years Office equipment 5 years - 10 years Furniture and fittings 3 years - 10 years Computer equipment 3 years - 5 years

Assets less than \$1,000 in value are expensed to profit or loss in the month of acquisition. Work-in-progress assets are not depreciated.

For the financial year ended 31 December 2024

2. Summary of material accounting information (continued)

(c) Property, plant and equipment (continued)

The residual values, estimated useful lives and depreciation method of property, plant and equipment are reviewed, and adjusted as appropriate, at each balance sheet date. The effects of any revision are recognised in profit or loss when the changes arise.

Subsequent expenditure relating to property, plant and equipment that has already been recognised is added to the carrying amount of the asset only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be reliably measured. All other repairs and maintenance expenses are recognised in profit or loss when incurred.

On disposal of an item of property, plant and equipment, the difference between the disposal proceeds and its carrying amount is recognised in profit or loss.

(d) Impairment of non-financial assets

Property, plant and equipment and intangible assets are tested for impairment whenever there is any objective evidence or indication that these assets may be impaired.

For the purpose of impairment testing, the recoverable amount (i.e. the higher of the fair value less cost to sell and the value in use) is determined on an individual asset basis unless the asset does not generate cash inflows that are largely independent of those from other assets. If this is the case, the recoverable amount is determined for the cash-generating unit ("CGU") to which the asset belongs.

If the recoverable amount of the asset (or CGU) is estimated to be less than its carrying amount, the carrying amount of the asset (or CGU) is reduced to its recoverable amount. The difference between the carrying amount and the recoverable amount is recognised as an impairment loss in profit or loss.

An impairment loss of an asset is reversed if, and only if, there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognised. The carrying amount of this asset is increased to its revised recoverable amount, provided that this amount does not exceed the carrying amount that would have been determined (net of any accumulated depreciation) had no impairment loss been recognised for the asset in prior years. A reversal of impairment loss for an asset is recognised in profit or loss.

For the financial year ended 31 December 2024

2. Summary of material accounting information (continued)

(e) Financial assets

(i) Initial measurement

Financial assets are initially recognised at fair value plus transaction costs.

(ii) Classification and measurement

The Company classifies its financial assets in the following categories:

- Amortised cost ("AC"),
- Fair value through other comprehensive income ("FVOCI") and
- Fair value through profit or loss ("FVTPL").

The classification depends on the nature of the asset and the purpose for which the assets were acquired. Management determines the classification of its financial assets at initial recognition.

The classification and subsequent measurement of financial assets depend on:

- a. the Company's business model for managing the financial asset; and
- b. the cash flow characteristics of the financial asset

Based on these factors, the Company classifies its financial assets into one of the following three measurement categories:

• AC: Financial assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest ("SPPI"), and that are not designated at FVTPL, are measured at AC. The carrying amount of these assets is adjusted by any expected credit loss ("ECL") allowance recognised. Interest income from these financial assets is included in interest income from financial assets not measured at FVTPL using the effective interest rate ("EIR") method.

For the financial year ended 31 December 2024

2. Summary of material accounting information (continued)

- (e) Financial assets (continued)
 - (ii) Classification and measurement (continued)

Financial assets (continued)

- FVOCI: Financial assets that are held for collection of contractual cash flows and for selling the assets, where the assets' cash flows represent SPPI, and that are not designated at FVTPL, are measured at FVOCI. Movements in the carrying amount are taken through Other Comprehensive Income ("OCI"), except for the recognition of impairment gains or losses, interest income and foreign exchange gains and losses on the instrument's AC, which are recognised in profit or loss. When the financial asset is derecognised, the cumulative gain or loss previously recognised in OCI is reclassified from equity to profit or loss and recognised in net fair value gains/ (losses) on financial assets. Interest income from these financial assets is included in interest income from financial assets not measured at FVTPL using the EIR method.
- FVTPL: Financial assets that do not meet the criteria for AC are measured at FVTPL. Also, some assets are voluntarily measured at FVTPL, because this significantly reduces an accounting mismatch. A gain or loss on an financial asset that is subsequently measured at FVTPL is recognised and presented in the profit or loss within net fair value gains/ (losses) on financial assets in the period in which it arises.

Business model assessment

The business model reflects how the Company manages assets in order to generate cash flows. That is, it reflects whether the Company's objective is solely to collect the contractual cash flows from assets or to collect both the contractual cash flows and cash flows arising from the sale of assets. If neither of these is applicable (e.g., financial assets are held for trading purposes), then the financial assets are classified as part of the other business model and measured at FVTPL. Factors considered by the Company in determining the business model for a Company of assets include past experience on how the cash flows for these assets were collected, how the asset's performance is evaluated and reported to key management personnel, how risks are assessed and managed and how managers are compensated.

For the financial year ended 31 December 2024

2. Summary of material accounting information (continued)

(e) Financial assets (continued)

(ii) Classification and measurement (continued)

Solely payments of principal and interest ("SPPI")

Where the business model is to hold assets to collect contractual cash flows or to collect contractual cash flows and sell, the Company assesses whether the financial instruments' cash flows meet SPPI test. In making this assessment, the Company considers whether the contractual cash flows are consistent with a basic lending arrangement (i.e., interest includes only consideration for the time value of money, credit risk, other basic lending risks and a profit margin that is consistent with a basic lending arrangement). Where the contractual terms introduce exposure to risk or volatility that are inconsistent with a basic lending arrangement, the related financial asset is classified and measured at FVTPL.

The Company may also irrevocably designate financial assets at FVTPL if doing so significantly reduces or eliminates a mismatch created by assets and liabilities being measured on different bases. The Company has determined that an accounting mismatch is reduced if all its investment assets are measured at FVTPL. For these instruments, the Company has applied the option to designate these financial assets at FVTPL.

Other financial assets

The Company measures all its other financial assets at amortised cost. The carrying amount of these assets is adjusted by any ECL allowance recognised. Interest income from these financial assets, if any, is included in interest income from financial assets not measured at FVTPL using the EIR method.

(iii) Reclassification of financial assets

The Company does not reclassify its financial assets subsequent to their initial recognition, apart from the exceptional circumstances in which the Company may determined that a reclassification is required in order to reduce accounting mismatch.

For the financial year ended 31 December 2024

2. Summary of material accounting information (continued)

(e) Financial assets (continued)

(iv) Impairment

The Company assesses on a forward-looking basis ECL associated with its financial assets carried at AC. The Company recognises a loss allowance for such losses at each reporting date. The measurement of the ECL reflects:

- an unbiased and probability weighted amount that is determined by evaluating a range of possible outcomes;
- the time value of money; and
- reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions.

The Company measures loss allowance for financial assets carried at AC and FVOCI based on three-stage model for impairment depending on the changes in credit quality since initial recognition as summarised below:

- financial instrument that is not credit-impaired on initial recognition is classified in Stage 1 and has its credit risk continuously monitored by the Company. ECL are provided for expected credit losses that result from default events that are possible within the next 12-months (12-month ECL).
- if a significant increase in credit risk ("SICR") since initial recognition is identified, the financial instrument is moved to Stage 2 but is not yet deemed to be credit impaired. A loss allowance is provided for credit losses expected over the remaining life of the exposure, irrespective of the timing of the default (lifetime ECL).
- if the financial instrument is credit-impaired, the financial instrument is then moved to Stage 3. A loss allowance is then provided for credit losses expected over the remaining life of the exposure, irrespective of the timing of the default (lifetime ECL).
- A pervasive concept in measuring the ECL in accordance with FRS 109 is that it should consider forward-looking information.
- Purchased or originated credit-impaired financial assets are those financial assets that are creditimpaired on initial recognition. Their ECL is always measured on a lifetime basis (lifetime ECL).

For the financial year ended 31 December 2024

2. Summary of material accounting information (continued)

(e) Financial assets (continued)

(iv) Impairment (continued)

Measurement of ECL

ECL is a probability-weighted estimate of the difference between the cash flows due to the Company in accordance with the contract and the cash flows that the Company expects to receive.

The ECL is the discounted product of the probability of default ("PD"), exposure at default ("EAD") and loss given default ("LGD"), defined as follows:

- PD an estimate of the likelihood of default over a given time horizon. It is estimated with consideration of economic scenarios and forward-looking information.
- EAD an estimate of the exposure at a future default date, taking into account expected changes in the exposure after the reporting date, including repayments of principal and interest, whether scheduled by contract or otherwise, and accrued interest from missed payments.
- LGD an estimate of the loss arising in the case where a default occurs at a given time. It is based on the difference between the contractual cash flows due and those that the Company would expect to receive. It is usually expressed as a percentage of the EAD.

The ECL is determined by projecting the PD, LGD and EAD for each future month and for each individual exposure or collective segment. These three components are multiplied together and adjusted for the likelihood of survival (that is, the exposure has not prepaid or defaulted in an earlier month). This effectively calculates an ECL for each future month, which is then discounted back to the reporting date and summed. The discount rate used in the ECL calculation is the original EIR or an approximation thereof.

The Lifetime PD is developed by applying a maturity profile to the current 12-month PD. The maturity profile looks at how defaults develop on a financial instrument portfolio from the point of initial recognition throughout the lifetime of the financial instrument. The maturity profile is based on historical observed data and is assumed to be the same across all assets within a portfolio and credit grade band. This is supported by historical analysis.

For the financial year ended 31 December 2024

2. Summary of material accounting information (continued)

(e) Financial assets (continued)

(iv) Impairment (continued)

Measurement of ECL (continued)

Forward-looking economic information is also included in determining the 12-month and lifetime PD, EAD and LGD. These assumptions vary by product type.

Loss allowances for ECL are presented as follows:

- AC: the loss allowance is deducted from the gross carrying amount of the assets; and
- FVOCI: the loss allowance does not reduce the carrying amount of the financial assets (which are measured at fair value). Instead it is recognized directly in profit or loss.

Credit-impaired financial assets

At each reporting date, the Company assesses whether financial assets measured at amortised cost and FVOCI are credit-impaired. A financial asset is credit impaired when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Evidence that a financial asset is credit-impaired includes the following observable data:

- significant financial difficulty of the debtor;
- a breach of contract such as a default or past-due event;
- the restructuring of an amount due to the Company on terms that the Company would not otherwise consider;
- it is becoming probable that the borrower will enter bankruptcy or other financial reorganisation; or
- disappearance of an active market for a security due to financial difficulties.

A financial asset that has been renegotiated due to a deterioration in the borrower's condition is usually considered to be credit-impaired unless there is evidence that the risk of not receiving contractual cash flows has reduced significantly and there are no other indicators of impairment.

For the financial year ended 31 December 2024

2. Summary of material accounting information (continued)

(e) Financial assets (continued)

(iv) Impairment (continued)

Low credit risk financial assets

For financial assets that have low credit risk, loss allowance is calculated and the financial asset is measured using 12-month ECL, provided that the financial asset meets the following criteria:

- the financial instrument has a low risk of default;
- the borrower is considered to have a strong capacity to meet its obligation in the near term; and
- the Company expects, in the longer term, that adverse changes in economic and business conditions might, but will not necessarily, reduce the ability of the borrower to fulfil its obligations.

(iv) Write-off

The gross carrying amount of a financial asset is written off when the Company has no reasonable expectations of recovering a financial asset in its entirety or a portion thereof. This is generally the case when the Company determines that the borrower does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write-off. This assessment is carried out at the individual asset level.

If the amount to be written off is greater than the accumulated loss allowance, the difference is first treated as an addition to the allowance that is then applied against the gross carrying amount. Any subsequent recoveries are credited to credit loss expense. There were no write-offs over the periods reported in these financial statements.

The Company's debt instruments are designated as FVTPL since initial recognition to reduce the accounting mismatch created by assets and liabilities being measured on different bases and, therefore, do not have any loss allowance from expected credit loss as of reporting date. All other financial assets are short-term and low risk in nature and loss allowance, if any, is immaterial to be disclosed.

For the financial year ended 31 December 2024

2. Summary of material accounting information (continued)

(e) Financial assets (continued)

(vi) Derecognition

Financial assets are derecognised when the rights to receive cash flows from them have expired or where they have been transferred and the Company has also transferred substantially all risks and rewards of ownership.

When the Company has neither transferred nor retained substantially all of the risks and rewards and has retained control of the asset, the asset continues to be recognised only to the extent of the Company's continuing involvement, in which case, the Company also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained. Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration the Company could be required to pay.

(f) Fair value estimation

The fair values of financial instruments traded in active markets (such as exchange-traded and over-the-counter securities and derivatives) are based on quoted market prices at the balance sheet date. The quoted market prices used for financial assets are the current bid prices; the appropriate quoted market prices for financial liabilities are the current asking prices.

The fair values of financial instruments that are not traded in an active market are determined by using valuation techniques. The Company uses a variety of methods and makes assumptions that are based on market conditions existing at each balance sheet date. When appropriate, quoted market prices or dealer quotes for similar instruments are used where appropriate. Valuation techniques, such as discounted cash flow analyses, are also used to determine the fair values of the financial instruments.

The fair values of current financial assets and liabilities carried at amortised cost approximate their carrying amounts.

(g) Other liabilities

Other liabilities are initially measured at fair value and subsequently measured at amortised cost, using the effective interest method.

For the financial year ended 31 December 2024

2. Summary of material accounting information (continued)

(h) <u>Insurance and reinsurance contracts</u>

The Company issues contracts that transfer insurance risk.

Insurance contracts are those contracts that transfer significant insurance risk. An insurance contract under which the Company (insurer) has accepted significant insurance risk from another party (the policyholders) by agreeing to compensate the policyholders if a specified uncertain future event (the insured event) adversely affects the policyholders. As a general guideline, the Company determines whether it has significant insurance risk, by comparing benefits paid with benefits payable if the insured event did not occur. The recognition and measurement of insurance contracts are set out in the financial statements. The adoption of FRS 117 did not change the classification of the Company's insurance contracts.

Investment contracts are those contracts that do not transfer significant insurance risk.

When insurance contracts contain both a financial risk component and a significant insurance risk component and the cash flows from the two components are distinct and can be measured reliably, the underlying amounts are unbundled. Any premiums relating to the insurance risk component are accounted for on the same basis as insurance contracts and the remaining element is accounted for as a deposit through the balance sheet similar to investment contracts.

(i) Separating components

The Company assesses its insurance and reinsurance products to determine whether they contain distinct components which must be separated and not accounted for under FRS 117. After separating any distinct components, the Company applies FRS 117 to all remaining components of the host insurance contract. Currently, the Company does not have any contracts that require further separation or combination of insurance contracts.

Insurance contracts with refund features are not separated under FRS 117. Where refunds are paid to the policyholder in all circumstances, they are accounted for as non-distinct investment components and are measured as part of the insurance contracts.

For the financial year ended 31 December 2024

2. Summary of material accounting information (continued)

(h) Insurance and reinsurance contracts (continued)

(ii) Level of aggregation

Insurance contracts are aggregated into groups for measurement purposes. Groups of insurance contracts are determined by identifying portfolios of insurance contracts, each comprising contracts subject to similar risks and managed together and dividing each portfolio into annual cohorts and each annual cohort into three groups based on the profitability of contracts:

- any contracts that are onerous at initial recognition;
- any contracts that at initial recognition have no significant possibility of becoming onerous subsequently; or
- any remaining contracts in the portfolio.

The profitability of groups of contracts is assessed by actuarial valuation models that take into consideration existing and new business.

The Company deems the local regulatory reporting product lines level as sets of contracts that have similar insurance risk, are managed together.

For the product lines deemed as onerous, these product lines are typically priced with a low expected profitability margins due to the historical low price adequacy level of the market in which the Company operates in as a result of competition on pricing.

All other contracts measured using the PAA, the Company assumes that no such contracts are onerous at initial recognition, unless facts and circumstances indicate otherwise. If facts and circumstances indicate that some contracts are onerous, an additional assessment is performed to distinguish onerous contracts from non-onerous ones.

The level of aggregation for reinsurance contracts are similar to insurance contracts except for profitability:

- net gain position at initial recognition;
- at initial recognition, there is no significant possibility of a net gain arising subsequently; or
- any remaining contracts in the portfolio.

For the financial year ended 31 December 2024

2. Summary of material accounting information (continued)

(h) Insurance and reinsurance contracts (continued)

(iii) Recognition

The Company recognises groups of insurance contracts it issues from the earliest of the following:

- The beginning of the coverage period of the group of contracts;
- The date when the first payment from a policyholder in the group is due or when the first payment is received if there is no due date;
- For a group of onerous contracts, if facts and circumstances indicate that the group is onerous.

A group of reinsurance contracts held is recognised at the earlier of:

- The beginning of the coverage period of the group; or
- The date the Company recognises an onerous group of underlying contracts, if the entity entered into the related reinsurance contract held in the group of reinsurance contracts held at or before that date.

(iv) Contract Boundary

Cash flows are within the contract boundary if they arise from substantive rights and obligations that exist during the reporting period in which the Company can compel the policyholder to pay premiums or has a substantive obligation to provide services. A substantive obligation to provide services ends when:

- the Company has the practical ability to reassess the risks of the particular policyholder and can set a price or level of benefits that fully reflects those reassessed risks; or
- the Company has the practical ability to reassess the risks of the portfolio that contains the contract
 and can set a price or level of benefits that fully reflects the risks of that portfolio, and the pricing
 of the premiums up to the reassessment date does not take into account risks that relate to periods
 after the reassessment date.

A liability or asset relating to expected premiums or claims outside the boundary of the insurance contract is not recognised. Such amounts relate to future insurance contracts.

For the financial year ended 31 December 2024

2. Summary of material accounting information (continued)

- (h) Insurance and reinsurance contracts (continued)
 - (v) Initial and subsequent measurement

Insurance Contracts

The Company applies PAA to all the insurance contracts that it issues as the Company has modelled possible future scenarios and reasonably expects that the measurement of LFRC for the group containing those contracts under the PAA does not differ materially from the measurement that would be produced applying the general model. In assessing materiality, the Company has also considered qualitative factors such as the nature of the risk and types of its lines of business.

For a group of contracts that are not onerous at initial recognition, the Company measures the LFRC as:

- the amount of premiums, if any, received at initial recognition;
- decreased for any insurance acquisition cash flows at that date;
- increased or decreased for any amount arising from the derecognition at that date of the asset recognised for insurance acquisition cash flows; and
- any other asset or liability previously recognised for cash flows related to the group of contracts that the Company pays or receives before the group of insurance contracts is recognised.

Subsequently, the Company measures the carrying amount of the LFRC at the end of each reporting period as the LFRC at the beginning of the period:

- increased by any premiums received in the period;
- decreased for insurance acquisition cash flows paid in the period;
- increased for any amounts relating to the amortisation of the insurance acquisition cash flows recognised as an expense in the reporting period;
- increased for any adjustment to the financing component, where applicable;
- decreased by the amount recognised as insurance revenue for the services provided in the period; and
- decreased for any investment component paid or transferred to the liability for incurred claims.

For the financial year ended 31 December 2024

2. Summary of material accounting information (continued)

- (h) Insurance and reinsurance contracts (continued)
 - (v) Initial and subsequent measurement (continued)

Insurance Contracts (continued)

Where facts and circumstances indicate that contracts are onerous at initial recognition, the Company performs additional analysis to determine if a net outflow is expected from the contract. Such onerous contracts are separately grouped from other contracts and the Company recognises a loss in profit or loss for the net outflow, resulting in the carrying amount of the liability for the group being equal to the fulfilment cash flows. A loss component is established by the Company for the LFRC for such onerous group depicting the losses recognised.

The Company does not adjust the LFRC for insurance contracts issued for the effect of the time value of money, because most insurance premiums are due within the coverage period of contracts, which is one year or less.

The Company estimates the LFIC as the fulfilment cash flows related to incurred claims. The fulfilment cash flows incorporate, in an unbiased way, all reasonable and supportable information available without undue cost or effort about the amount, timing and uncertainty of those future cash flows, they reflect current estimates from the perspective of the Company and include an explicit adjustment for non-financial risk (the risk adjustment). Future cash flows are adjusted for the time value of money.

Reinsurance Contracts

The Company measures its reinsurance assets for a group of reinsurance contracts that it holds on to the same basis as insurance contracts that it issues. However, they are adapted to reflect the features of reinsurance contracts held that differ from insurance contracts issued.

Reinsurance contacts held by the Company falls into the following categories:

- Facultative reinsurance contracts;
- Loss occurring reinsurance treaty contracts; and
- Risk attaching reinsurance treaty contracts.

Facultative reinsurance contracts are assessed for PAA eligibility on the same basis as the underlying insurance contract attached.

For the financial year ended 31 December 2024

2. Summary of material accounting information (continued)

- (h) Insurance and reinsurance contracts (continued)
 - (v) Initial and subsequent measurement (continued)

Reinsurance Contracts (continued)

Loss occurring and risk attaching reinsurance treaty contracts are assessed for PAA eligibility based on the maximum coverage period of a group of contracts under each treaty by taking the earliest start date and the latest expiry date in a group of contracts.

The Company has modelled possible future scenarios and reasonably expects that the measurement of LFRC for the reinsurance contracts held, under the PAA does not differ materially from the measurement that would be produced applying the general model.

On initial recognition, the remaining coverage for reinsurance contracts held is:

- the amount of ceding premiums paid;
- increased by broker fees paid to a party other than the reinsurance; and
- increased by any amounts arising from the derecognition of any other relevant pre-recognition cash flows.

At each of the subsequent reporting dates, the remaining coverage for reinsurance contracts held is:

- increased for ceding premiums paid in the period;
- increased for broker fees paid in the period; and
- decreased for the expected amounts of ceding premiums and broker fees recognised as reinsurance expenses for the services received in the period.

Where the Company recognises a loss on initial recognition of an onerous group of underlying insurance contracts or when further onerous underlying insurance contracts are added to a group, the Company establishes a loss-recovery component of the asset for remaining coverage for a group of reinsurance contracts held depicting the recovery of losses.

For the financial year ended 31 December 2024

2. Summary of material accounting information (continued)

- (h) Insurance and reinsurance contracts (continued)
 - (v) Initial and subsequent measurement (continued)

Reinsurance Contracts (continued)

The Company calculates the loss-recovery component by multiplying the loss recognised on the underlying insurance contracts and the percentage of claims on the underlying insurance contracts the Company expects to recover from the group of reinsurance contracts held. The Company uses a systematic and rational method to determine the portion of losses recognised on the group to insurance contracts covered by the group of reinsurance contracts held where some contracts in the underlying group are not covered by the group of reinsurance contracts held.

The Company subsequently reduces the loss-recovery component to zero in line with reductions in the onerous group of underlying insurance contracts in order to reflect that the loss-recovery component shall not exceed the portion of the carrying amount of the loss component of the onerous group of underlying insurance contracts that the entity expects to recover from the group of reinsurance contracts held.

The loss-recovery component adjusts the carrying amount of the asset for remaining coverage.

Insurance acquisition cash flows

Insurance acquisition cash flows arise from the costs of selling, underwriting and starting a group of insurance contracts (issued or expected to be issued) that are directly attributable to the portfolio of insurance contracts to which the group belongs.

The Company uses a systematic and rational method to allocate:

- Insurance acquisition cash flows that are directly attributable to a group of insurance contracts; and
- Insurance acquisition cash flows directly attributable to a portfolio of insurance contracts that are not
 directly attributable to a group of contracts, to groups in the portfolio.

The Company does not recognise any insurance acquisition cash flows for renewals outside the contract boundary as of the reporting date.

For the financial year ended 31 December 2024

2. Summary of material accounting information (continued)

(h) Insurance and reinsurance contracts (continued)

(vi) Derecognition and contract modification

The Company derecognises a contract when it is extinguished, i.e., when the specified obligations in the contract expire or are discharged or cancelled.

The Company also derecognises a contract if its terms are modified in a way that would have changed the accounting for the contract significantly had the new terms always existed, in which case a new contract based on the modified terms is recognised. If a contract modification does not result in derecognition, then the Company treats the changes in cash flows caused by the modification as changes in estimates of fulfilment cash flows.

(vii) Presentation

The Company has presented separately, in the balance sheet, the carrying amount of portfolios of insurance contracts issued that are assets, portfolios of insurance contracts issued that are liabilities, portfolios of reinsurance contracts held that are liabilities.

Any assets for insurance acquisition cash flows recognised before the corresponding insurance contracts are allocated and included in the carrying amount of the related groups of insurance contracts.

The Company disaggregates the total amount recognised in profit or loss into an insurance service result, comprising insurance revenue and insurance service expense, and insurance finance income or expenses.

The Company does not disaggregate the change in risk adjustment for non-financial risk between a financial and non-financial portion and includes the entire change as part of the insurance service result.

The Company separately presents income or expenses from reinsurance contracts held from the expenses or income from insurance contracts issued.

(i) Insurance revenue

The insurance revenue for the period is the amount of expected premium receipts allocated to the period. The Company allocates the expected premium receipts to each period of insurance contract services on the basis of the passage of time. But if the expected pattern of release of risk during the coverage period differs significantly from the passage of time, then the allocation is made on the basis of the expected timing of incurred insurance service expenses.

For the financial year ended 31 December 2024

2. Summary of material accounting information (continued)

(h) Insurance and reinsurance contracts (continued)

(vii) Presentation (continued)

(ii) Insurance service expenses

Insurance service expenses arising from insurance contracts are recognised in profit or loss generally as they are incurred. They exclude repayments of investment components and comprise the following items:

- incurred claims and other insurance service expenses;
- losses on onerous contracts and reversals of such losses;
- adjustments to the liabilities for incurred claims that do not arise from the effects of the time value of money, financial risk and changes therein; and
- impairment losses on assets for insurance acquisition cash flows and its reversals.

(iii) Net income or expense from reinsurance contracts held

Net income or expenses from reinsurance contracts comprise an allocation of reinsurance premiums paid less amounts recovered from reinsurers.

For contracts measured under the PAA, the allocation of reinsurance premiums paid for each period is the amount of expected premium payments for receiving services in the period.

For a group of reinsurance contracts covering onerous underlying contracts, the Company establishes a loss-recovery component of the asset for remaining coverage to depict the recovery of losses recognised:

- on recognition of onerous underlying contracts, if the reinsurance contract covering those contracts is entered into before or at the same time as those contracts are recognised; and
- for changes in fulfilment cash flows of the Company of reinsurance contracts relating to future services that result from changes in fulfilment cash flows of the onerous underlying contracts.

For the financial year ended 31 December 2024

2. Summary of material accounting information (continued)

(h) Insurance and reinsurance contracts (continued)

(vii) Presentation (continued)

(iii) Net income or expense from reinsurance contracts held (continued)

The loss-recovery component determines the amounts that are subsequently presented in profit or loss as reversals of recoveries of losses from the reinsurance contracts and are excluded from the allocation of reinsurance premiums paid. It is adjusted to reflect changes in the loss component of the onerous group of underlying contracts, but it cannot exceed the portion of the loss component of the onerous group of underlying contracts that the Company expects to recover from the reinsurance contracts.

(iv) Insurance finance income or expenses

Insurance finance income or expenses comprise the change in the carrying amount of the group of insurance contracts arising from:

- The effect of the time value of money and changes in the time value of money; and
- The effect of financial risk and changes in financial risk.

(i) Leases

When the Company is the lessee

At the inception of the contract, the Company assesses if the contract contains a lease. A contract contains a lease if the contract convey the right to control the use of an identified asset for a period of time in exchange for consideration. Reassessment is only required when the terms and conditions of the contact are changed.

(i) Right-of-use asset

The Company recognised a right-of-use asset and lease liability at the date which the underlying asset is available for use. Right-of-use assets are measured at cost which comprises the initial measurement of lease liabilities adjusted for any lease payments made at or before the commencement date and lease incentive received. Any initial direct costs that would not have been incurred if the lease had not been obtained are added to the carrying amount of the right-of-use assets.

For the financial year ended 31 December 2024

2. Summary of material accounting information (continued)

(i) Leases (continued)

When the Company is the lessee (continued)

(ii) Lease liability

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the earlier of the end of the useful life or the end of the lease term.

Lease liability is measured at amortised cost using the effective interest method. Lease liability shall be remeasured when:

- there is a change in future lease payments arising from changes in an index or rate; or
- there is a change in the Company's assessment of whether it will exercise an extension option; or
- there are modification in the scope or the consideration of the lease that was not part of the original term.

Lease liability is remeasured with a corresponding adjustment to the right-of-use asset, or recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

(iii) Short-term and low-value leases

The Company has elected to not recognise right-of-use assets and lease liabilities for short-term leases that have lease terms of 12 months or less and leases of low value. Lease payments relating to these leases are expensed to profit or loss.

(iv) Variable lease payments

Variable lease payments that are not based on an index or a rate are not included as part of the measurement and initial recognition of the lease liability. The Company shall recognize those lease payments in profit or loss in the periods that triggered those lease payments.

For contract which contains lease and non-lease components, the Company allocates the consideration based on a relative stand-alone selling price basis.

For the financial year ended 31 December 2024

2. Summary of material accounting information (continued)

(j) Income taxes

Current income tax for current and prior periods is recognised at the amount expected to be paid to or recovered from the tax authorities, using the tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation and considers whether it is probable that a tax authority will accept an uncertain tax treatment. The Company measures its tax balances either based on the most likely amount or the expected value, depending on which method provides a better prediction of the resolution of the uncertainty.

Deferred income tax is recognised for all temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements except when the deferred income tax arises from the initial recognition of an asset or liability in a transaction that affects neither accounting nor taxable profit or loss at the time of the transaction.

A deferred income tax asset is recognised to the extent that it is probable that future taxable profit will be available against which the deductible temporary differences and tax losses can be utilised.

Deferred income tax is measured:

- (i) at the tax rates that are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled, based on tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date; and
- (ii) based on the tax consequence that will follow from the manner in which the Company expects, at the balance sheet date, to recover or settle the carrying amounts of its assets and liabilities.

Current and deferred income taxes are recognised as income or expense in profit or loss, except to the extent that the tax arises from a transaction which is recognised directly in equity.

For the financial year ended 31 December 2024

2. Summary of material accounting information (continued)

(k) Provisions for other liabilities and charges

Provisions for other liabilities and charges are recognised when the Company has a legal or constructive obligation as a result of past events, it is more likely than not that an outflow of resources will be required to settle the obligation, and the amount can be reliably estimated.

(l) Employee benefits

(i) Defined contribution plans

Defined contribution plans are post-employment benefit plans under which the Company pays fixed contributions into separate entities such as the Central Provident Fund on a mandatory, contractual or voluntary basis. The Company has no further payment obligations once the contributions have been paid.

(ii) Employee leave entitlement

Employee entitlements to annual leave and long service leave are recognised when they accrue to employees. A provision is made for the estimated liability for annual leave and long-service leave as a result of services rendered by employees up to the balance sheet date.

(iii) Share-based compensation

The Company's ultimate holding corporation operates several share-based compensation plans. The total amount of equity-settled transactions to be recognised over the vesting period is determined by reference to the fair value on the date of the grant. The cost of equity-settled transactions is recognised as an expense together with a corresponding increase in equity over the vesting period, and subsequently recharged by the Company's ultimate holding corporation.

For the financial year ended 31 December 2024

2. Summary of material accounting information (continued)

(m) Currency translation

(i) Functional and presentation currency

Items included in the financial statements of the Company are measured using the currency of the primary economic environment in which the entity operates ("the functional currency"). The financial statements are presented in Singapore Dollar, which is the functional currency of the Company.

(ii) Transactions and balances

Transactions in a currency other than the functional currency ("foreign currency") are translated into the functional currency using the exchange rates at the dates of the transactions. Currency translation differences resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies at the closing rates at balance sheet date are recognised in profit or loss.

Changes in the fair value of monetary securities denominated in foreign currencies classified as FVTPL are recognised in profit or loss.

Non-monetary items measured at fair values in foreign currencies are translated using the exchange rates at the date when the fair values are determined.

(n) Cash and cash equivalents

For the purpose of presentation in the statement of cash flows, cash and cash equivalents include cash on hand, cash at bank and fixed deposits with financial institutions which are subject to an insignificant risk of change in value.

(o) Government grants

Grants from the government are recognised as a receivable at their fair value when there is reasonable assurance that the grant will be received and the Company will comply with all the attached conditions.

For the financial year ended 31 December 2024

2. Summary of material accounting information (continued)

(o) Government grants (continued)

Government grants are recognised in other operating income in profit or loss on a systematic basis over the periods in which the entity recognises as expenses the related costs for which the grants are intended to compensate.

(p) Share capital

Ordinary shares are classified as equity.

(g) Offsetting of financial instruments

Financial assets and liabilities are offset and the net amount reported in the balance sheet when there is a legally enforceable right to offset and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously.

(r) Dividend

Dividends to the Company's member are recognised when the dividends are approved for payment.

3. Critical accounting estimates, assumptions and judgements

Estimates, assumptions and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Insurance contract liabilities and reinsurance assets

The Company applies the PAA to simplify the measurement of insurance contracts. When measuring liabilities for remaining coverage, the PAA is broadly similar to the Company's previous accounting treatment under FRS 104 Insurance Contracts. However, when measuring liabilities for incurred claims, the Company now discounts projected future claims payment, both gross and net of reinsurance and other recoveries and associated claims handling costs, to a present value using risk-free discount rates (derived from market yields on government bonds) to reflect the time value of money.

For the financial year ended 31 December 2024

3. Critical accounting estimates, assumptions and judgements (continued)

Insurance contract liabilities and reinsurance assets (continued)

(i) Liability for remaining coverage - Onerous groups

The Company has assessed and identified insurance contracts that are onerous based on the facts and circumstances which indicate that the contracts are onerous. Further, judgement is required to assess whether facts and circumstances indicate that any changes in the onerous group's profitability and whether any loss component remeasurement is required.

Loss-recovery component is determined with reference to the loss component recognised on underlying contracts and the recovery expected on such claims from reinsurance contracts held.

(ii) Liability for incurred claims

Liabilities for incurred claims for each group of business are estimated by reference to a variety of estimation techniques, generally based on a statistical analysis of historical experience which assumes an underlying pattern of claims development, claims payment and the direct and indirect claims-related expenses. Risk adjustment on non-financial risk was also included in liabilities for incurred claims. It is a component of the value of the insurance liabilities which is set at a level such that there is a higher level of confidence (or probability) that the provisions will ultimately be sufficient. For the purpose of this valuation basis, the level of confidence is at 75% at an overall Company level. The stand-alone risk adjustments for liability for incurred claims for each portfolio were determined using bootstrapping analysis.

The final selected estimates are based on a judgemental consideration of results of each method and qualitative information, for example, the class of business, the maturity of the portfolio and expected term to settlement of the class. Projections are based on historical experience and external benchmarks where relevant.

The ultimate costs of outstanding claims were assessed using four standard actuarial valuation methods:

Chain Ladder methods:

The Chain Ladder method is based on the analysis of the historical claim development by accident year and assumption that the Company's own claim experience is indicative of future claim development patterns. Selected claim development factors are implicitly derived from the aforementioned historical claim development data and are then applied to cumulative claims data for each accident year that is not fully developed to produce an estimated ultimate cost of outstanding claims for each accident year.

For the financial year ended 31 December 2024

3. Critical accounting estimates, assumptions and judgements (continued)

Insurance contract liabilities and reinsurance assets (continued)

(ii) Liability for incurred claims (continued)

Chain Ladder on Incurred Claim Development method is based on the development of reported incurred claims by accident year. This method is generally applied onto the older accident years where we claim experience has matured and are close to the ultimate.

Chain Ladder on Paid Claim Development method is based on the development of paid claims by accident year. This method while generally not suitable for direct use due to the inherent variability in corporate lines business, is a necessary method as a check on other actuarial models applied and to determine claim payment patterns to enable discounted liability estimates to be derived.

Chain Ladder on Average Incurred Cost Development method is based on the development of the reported average claim size multiplied by the selected ultimate claim counts by accident year. This method is used primarily as a sense-check against the results derived from the Chain Ladder on Incurred Claim Development method and Bornhuetter Ferguson method.

Bornhuetter Ferguson method:

The Bornhuetter Ferguson method estimates the ultimate cost of outstanding claims based on a blend of projected losses (i.e. starting expected ultimate loss ratio assumption) and the actual emerging loss experience. This method is applied to recent accident years where claim experience is deemed to be less mature and added conservatism is adopted to derive the Incurred but not reported reserves ("IBNR").

The methods adopted for each class of business depends on the nature of the portfolio, the volume and stability of past claim data and the expected future claim development.

The key assumptions and the sensitivity analysis of liabilities of incurred claims are disclosed in Note 12 to the financial statements.

For the financial year ended 31 December 2024

3. Critical accounting estimates, assumptions and judgements (continued)

Insurance contract liabilities and reinsurance assets (continued)

(ii) Liability for incurred claims (continued)

Discount rates

A bottom-up approach was applied in the determination the discount rates used to discount insurance contract liabilities and reinsurance contract assets. Under this approach, the discount rates are determined as the risk-free yield, adjusted for difference in liquidity characteristics between the financial assets used to deliver the risk-free yield and the relevant cash flows (known as 'illiquidity premium'). Risk-free rates are determined by reference to the government bond yield curves to derive an appropriate discount rate which matches cashflows in terms of duration, timing and currency. The illiquidity premium has been considered to be zero considering the short-term liability duration. The Company applies judgment in assessing the liquidity characteristics of the liability cash flows.

Discount rates applied for discounting of future cash flows are listed below:

	6 Months	1 Year	2 Years	5 Years	10 Years	20 Years	30 Years
2024

Outsourcing expenses	-	1,197	2,834	4,031
Other expenses	1,126	575	4,843	6,544
Total other expenses	22,042	5,713	65,043	92,798

For the financial year ended 31 December 2024

6. Other operating expenses (continued)

Breakdown of Other expenses for 2023

	Expenses attributable to insurance acquisition cash flows	Expenses related to Claims handling	Other operating expenses	Total
	\$'000	\$'000	\$'000	\$'000
Advertising expenses	2,783	-	4,117	6,900
Audit Legal and other professional fees	-	1	718	719
Bank Charges	-	-	1,062	1,062
Depreciation and amortisation	-	46	3,333	3,379
Depreciation for right of use	-	-	2,334	2,334
Employee expenses	15,682	2,814	23,068	41,564
Interest expenses on lease liabilities	-	-	371	371
IT related expenses	-	601	4,893	5,494
Management fees paid to related parties	-	-	18,917	18,917
Outsourcing expenses	-	1,029	2,985	4,014
Other expenses	951	918	2,959	4,828
Total other expenses	19,416	5,409	64,757	89,582

7. Income taxes

(a) Income Tax expense

	2024	2023
	\$'000	\$'000
Tax expense attributable to profit is made up of: - Current income tax - Deferred income tax expense (Note 15) - Withholding tax (credit)/expenses	6,021 486 47	4,874 691 (90)
	6,554	5,475
Over-provision in prior financial years	(33)	-
	6,521	5,475

For the financial year ended 31 December 2024

7. Income taxes (continued)

(a) Income Tax expense (continued)

The tax expense on profit differs from the amount that would arise using the Singapore standard rate of income tax due to the following:

	2024	2023
	\$'000	\$'000
Profit before income tax	51,450	44,970
Tax calculated at a tax rate of 17% (2023: 17%)	8,746	7,645
Effects of: - Income taxed at concessionary rate of 10% - Expenses not deductible for tax purposes - Singapore statutory stepped income exemption - Tax incentives - Withholding tax (credit)/expense - Over-provision in prior financial years - Others	(2,312) 128 (17) (38) 47 (33)	(1,915) 263 (17) (40) (90) - (371)
Tax expense	6,521	5,475

(b) Movements in current income tax liabilities

	2024	2023
	\$'000	\$'000
Beginning of financial year	5,588	2,822
Income tax paid	(5,140)	(2,110)
Tax expense	6,021	4,874
Over-provision in prior financial years	(33)	2
End of financial year	6,436	5,588

(c) OECD Pillar Two model rules

The Company is within the scope of the OECD Pillar Two model rules. Pillar Two legislation was enacted in Singapore, the jurisdiction in which the Company is incorporated, and will come into effect from 1 January 2025. Since Pillar Two legislation was not effective at the reporting date, the Company has no related current tax exposure. The Company applies the exemption to recognising and disclosing information about deferred tax assets and liabilities related to Pillar Two income taxes.

Under the legislation, the Company is liable to pay a top-up tax for the difference between the GloBE effective tax rate and the 15% minimum rate. The Company's effective tax rates does not exceed 15% in the jurisdiction which it operates in. For 2024, the average effective tax rate (calculated in accordance with paragraph 86 of FRS 12) of the Company is:

For the financial year ended 31 December 2024

7. Income taxes (continued)

(c) OECD Pillar Two model rules (continued)

	The Company
	\$'000
Tax expense for the year ended 31 December 2024	6,521
Accounting profit for the year ended 31 December 2024	51,450
Average effective tax rate	12.7%

The Company is in the process of assessing its exposure to the Pillar Two legislation for when it comes into effect. This assessment, as shown in the table above, indicates that, for the Company, the average effective tax rate based on accounting profit is 12.7% for the annual reporting period ending 31 December 2024. However, although the average effective tax rate is below 15%, the Company's exposure to paying Pillar Two income taxes might not be for the full difference in tax rates in relation to Singapore jurisdiction. This is due to the impact of specific adjustments envisaged in the Pillar Two legislation which give rise to different effective tax rates compared to those calculated in accordance with FRS 12.

Based on the management's assessment, there is no material impact from exposure to Pillar Two legislation on the going concern of the Company, or on any asset impairment.

For the financial year ended 31 December 2024

8. Intangible assets

10. Financial assets, at fair value through profit or loss

The movements during the year are as follows:

	2024	2023
	\$'000	\$'000
Beginning of financial year Additions Fair value gains recognised through profit or loss Maturities and disposals Currency translation gain / (losses)	389,181 276,523 7,725 (305,129) 293	338,259 688,556 11,158 (648,280) (512)
End of financial year	368,593	389,181

Financial assets available-for-sale was reclassified to financial assets, at fair value through profit/loss as at 1 January 2023.

Financial assets, at fair value through profit or loss are analysed as follows:

	2024	2023
	\$'000	\$'000
Government securities: Government securities - SGD Government securities - USD	205,148 16,720	208,272 14,885
	221,868	223,157
Debt securities: Debt securities - SGD Debt securities - USD	117,183 29,542	136,924 29,100
	146,725	166,024
	368,593	389,181

The government and debt securities have maturity dates from January 2025 to May 2034 (2023: January 2024 to October 2031) with the following weighted average effective interest rates:

	2024	2023
SGD	2.17%	1.74%
USD	1.55%	1.45%

The exposure of investments to interest rate risks is disclosed in Note 19(a)(ii).

For the financial year ended 31 December 2024

11. Other assets

12. Insurance and reinsurance contracts (continued)

Actuarial methods, assumptions and sensitivity analysis

(a) Methods

Four standard actuarial methods (Chain ladder on Incurred and Paid Claims, Bornhuetter-Ferguson and Average Incurred Cost Development) have been applied to each class of business to determine the insurance liabilities. The selection of an appropriate method depends on the nature of the claim development and claim volatility. The Outstanding Liability is equal to the Case Estimates in situations where no further loss development is expected.

The insurance liabilities also include an appropriate allowance for allocated and unallocated future claim handling expenses. In addition, an administration expense reserve of 5.2% (2023: 5.4%) of gross premiums (or gross unearned premium reserve) and excess of loss ceded premiums has been included in the assessment of the premium liability.

(b) Assumptions

The following assumptions were used in determining the gross outstanding claim liabilities.

Ultimate claim number - current year

The ultimate claim number for the current accident year is estimated separately by class of business by projecting the number of claims reported to date based on historical reporting patterns.

Average claim size - current year

The average claim size for the current accident year is estimated separately by class of business by projecting the ultimate claims cost based on historical claim development patterns and dividing by the estimated ultimate claim number.

Unallocated claim expense rate (or indirect claim expense rate)

The unallocated claim expense rate is calculated separately by class of business based on historical unallocated claim expenses as a percentage of historical payments.

Inflation rate

The inflation rate is implicit in the valuation models used so no explicit inflation rate is used in the valuation. Movement in average claim size provides a de facto estimate of the inflation rate implied in the valuation.

For the financial year ended 31 December 2024

12. Insurance and reinsurance contracts (continued)

Actuarial methods, assumptions and sensitivity analysis (continued)

(b) <u>Assumptions (continued)</u>

Discount rate

The discount rate is derived from market yields of government securities at the balance sheet date.

Initial expected loss ratio for current accident year

Expected loss ratio for current accident year is estimated separately derived by class of business by one of the four methods under Note 3 (ii).

Risk adjustment

The overall risk adjustment was determined after allowing for uncertainty of the outstanding claim estimate. Uncertainty was analysed for each class of business taking into account potential uncertainties relating to the actuarial models and assumptions, the quality of the underlying data used in the models and the general insurance environment.

The estimate of uncertainty is greater for long tailed classes when compared to short tail classes due to the longer time until settlement of outstanding claims.

The assumptions regarding uncertainty for each class were applied to the gross and net central estimates, and the results were aggregated to arrive at an overall provision which is intended to have a 75% probability of sufficiency. The risk adjustment applied in 2024 is 10.7% (2023: 10.6%).

For the financial year ended 31 December 2024

12. Insurance and reinsurance contracts (continued)

(c) <u>Sensitivity analysis</u>

The Company conducts sensitivity analysis to quantify the exposure to risk of changes in the key underlying variables. The valuations included in the reported results for 2024 are calculated using certain assumptions about these variables as disclosed above. The movement in any key variable will impact the performance and equity of the Company. The table below shows how a reasonable possible change in each assumption will affect the outstanding claims liabilities and profit or loss. As no explicit inflation rate is used in the valuation no sensitivity analysis is performed for a change in the inflation rate.

Variables	Change in variables	Impact on gross liabilities	Impact on net liabilities	Impact on profit before tax gross of reinsurance	Impact on profit before tax net of reinsurance	Impact on equity gross of reinsurance	Impact on equity net of reinsurance

13. Cash and cash equivalents

	2024	2023
	\$'000	\$'000
Cash at bank		
- SGD	2,464	12,374
- USD	2,810	7,357
Fixed deposits with financial institutions - SGD	12,860	1,453
Fixed deposits with financial institutions - USD	20,373	6,303
	38,507	27,487

The carrying amounts of cash and cash equivalents approximate their fair values.

The Company held fixed deposits with financial institutions with an average maturity of 0.8 months and 0.6 months for SGD and USD respectively as at the end of the financial year 2024 (2023: 1 month and 1.8 months for SGD and USD respectively) with the following weighted average interest rates:

	2024	2023
SGD	2.03%	2.98%
USD	3.85%	5.13%

14. Other liabilities

	2024	2023
	\$'000	\$'000
Amounts due to related companies	2,043	6,559
Cash collateral	40	40
Share-based remuneration payable	914	805
Sundry creditors	3,831	6,761
GST payable	3,417	2,901
Accrued operating expenses	29,965	25,865
Total other liabilities	40,210	42,931

Amounts due to related companies are unsecured, interest-free and are repayable on demand. The carrying amounts of other liabilities approximate their fair values.

For the financial year ended 31 December 2024

15. Deferred income taxes

Deferred income tax assets and liabilities are offset when there is a legally enforceable right to set off current income tax assets against current income tax liabilities and when the deferred income taxes relate to the same fiscal authority. The amounts, determined after appropriate offsetting, are shown on the balance sheet.

The amounts, determined after appropriate offsetting, are shown on the balance sheet as follows:

	2024	2023
	\$'000	\$'000
Deferred tax assets	(103)	(102)
Deferred tax liabilities	2,771	2,284
Net deferred tax liabilities	2,668	2,182

The movement in the deferred income tax account is as follows:

	2024	2023
	\$'000	\$'000
Beginning of financial year	2,182	1,491
Tax charge/(credit) to:		
- Profit or loss (Note 7(a))	486	691
End of financial year	2,668	2,182

The movement in the deferred income tax assets and liabilities (prior to offsetting of balances within the same tax jurisdiction) during the financial year is as follows:

Deferred income tax liabilities/(assets)

	Accelerated tax depreciation	Fair value losses	Others	Total
	\$'000	\$'000	\$'000	\$'000
2024				
At 1 January 2024	2,284	-	(102)	2,182
Charged / (credited) to profit or loss	487	-	(1)	486
At 31 December 2024	2,771	-	(103)	2,668
2023				
At 1 January 2023	3,561	(1,994)	(76)	1,491
Charged / (credited) to profit or loss	(1,277)	1,994	(26)	691
At 31 December 2023	2,284	-	(102)	2,182

For the financial year ended 31 December 2024

	\$ '000	\$'000
Lease liabilities		
Current	2,696	2,570
Non-current	2,957	5,640
	5,653	8,210

Total cash outflow for all leases in 2024: \$2,836,000 (2023: \$2,818,000).

18. Immediate and ultimate holding corporations

The Company is a wholly-owned subsidiary of ACE INA Overseas Insurance Company Ltd, incorporated in Bermuda.

The ultimate holding corporation is Chubb Limited, incorporated in Switzerland.

For the financial year ended 31 December 2024

19. Financial risk management

The Company's activities expose it to a variety of financial risks. The components of financial risk are market risk (including currency risk, and interest rate risk), credit risk and liquidity risk.

These financial risks arise from the investment and underwriting activities of the business. Investment activity of the business is exposed to the general and specific market movements. The underwriting activity of the business generates credit and liquidity risk through insurance and reinsurance receivables and payables.

The Company's overall risk management focuses to mitigate potential adverse effects of these risks on the financial performance of the Company. The notes below explain the management of financial risks.

Underwriting activity governance

The underwriting activity is governed by the Company's Risk Management Framework. In the framework, the Board of Directors has overall risk management responsibility of the Company and approves its risk management strategy ensuring key risks are identified and managed appropriately. The framework includes the following:

- (i) continuous identification of risks and the management of internal controls;
- (ii) training and guidance of all relevant employees in the management of risk;
- (iii) management reporting, monitoring and action to address significant issues adversely affecting the business;
- (iv) implementation of loss prevention and control measures to reduce loss, injury, or damage;
- (v) maintenance of the highest practicable protection standards against losses to assets and business interruption;
- (vi) efficient management of information, records and loss recording systems;
- (vii) implementation of proactive strategies to limit the liability of the Company and protect its reputation;
- (viii) crisis management and recovery by planning for significant risks; and
- (ix) cost benefit management of insurance and other risk control programs; and clearly defined managerial responsibilities and controls.

Investment activity governance

The principal investment objective of the Company is to ensure that funds will be available to meet the Company's primary insurance and reinsurance obligations. Within this broad liquidity constraint, the investment portfolio's structure seeks to maximise return subject to specifically-approved guidelines of overall asset classes, credit quality, liquidity, and volatility of expected returns. As such, the Company's investment portfolio is invested primarily in investment-grade fixed-income securities as measured by the major rating agencies.

The management of the Company's investment portfolio is the responsibility of the Investment Committee which is accountable to Chubb Asset Management Inc., incorporated in the United States of America, for monitoring, evaluating, development and coordination of the Company's investment related activities.

For the financial year ended 31 December 2024

19. Financial risk management (continued)

<u>Investment activity governance (continued)</u>

The Investment Committee is chaired by the Asia Pacific Regional Chief Financial Officer and is comprised of at least three members. Under the guidance of the Chubb Asset Management Inc., the Investment Committee shall:

- (i) establish recommended investment guidelines that are appropriate to the prescribed asset allocation targets;
- (ii) monitor performance of investment returns, reporting and internal controls for all investment activities, foreign exchange, interest rate, liquidity and credit risks and to ensure appropriate systems in place for identifying and monitoring such risks; and
- (iii) recommend the appointment of fund managers.

The investment management function is outsourced to Western Asset Management Company Pte Limited.

(a) Market Risk

(i) Currency risk

The Company's currency risk arises mainly with respect to insurance business and investment activities transactions denominated in United States Dollar ("USD"). USD liabilities are backed by assets in the underlying currency. Exposures to foreign currency risks are monitored on an on-going basis.

The Company's policy seeks to ensure an approximate currency match of assets and liabilities is maintained, with the bulk of surplus funds matched by Singapore Dollar and lesser surpluses held in USD.

The Company's currency exposure based on the information provided to key management is as follows:

	2024			
	SGD	USD	Others	Total
	\$'000	\$'000	\$,000	\$'000
Financial assets				
Financial assets, at fair value through profit or loss	322,331	46,262	-	368,593
Other assets	9,616	1,830	-	11,446
Reinsurance contract assets	303,341	62,381	6,492	372,214
Cash and cash equivalents	15,324	23,183	-	38,507
	650,612	133,656	6,492	790,760
Financial liabilities			•	
Insurance contract liabilities	477,281	100,020	(915)	576,386

	507,433	111,834	(2,671)	616,596
Currency exposure		21,822	9,163	

For the financial year ended 31 December 2024

19. Financial risk management (continued)

(a) Market Risk (continued)

(i) Currency risk (continued)

	2023			
	SGD	USD	Others	Total
	\$'000	\$'000	\$'000	\$'000
Financial assets				
Financial assets, at fair value through profit or loss	345,196	43,985	-	389,181
Other assets	7,471	2,434	-	9,905
Reinsurance contract assets	289,146	72,916	13,025	375,087
Cash and cash equivalents	13,826	13,661	-	27,487
	655,639	132,996	13,025	801,660
Financial liabilities				,
Insurance contract liabilities	482,732	78,752	12,134	573,618
Other liabilities	27,155	17,561	(1,785)	42,931
	509,887	96,313	10,349	616,549
Currency exposure		36,683	2,676	

If USD changes against the SGD by 6.02% (2023: 3.93%) with all other variables including tax rate being held constant, the effects arising from the currency exposure will be as follows:

	← Increase/(decrease)				
		2024	2023		
	Profit before tax			Impact on equity	
	\$'000	\$'000	\$'000	\$'000	
Increase/(decrease)				•	
<u>USD against SGD</u>					
- strengthened	1,310	1,087	1,441	1,196	
- weakened	(1,310)	(1,087)	(1,441)	(1,196)	

(ii) Interest rate risks

Cashflow interest rate risk is the risk that the future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Fair value interest rate risk is the risk that the value of a financial instrument will fluctuate due to changes in market interest rates. The Company manages its interest rate risks by placing such balances on varying maturities and interest rate terms.

The income and operating cash flows are substantially independent of the changes in market interest rates as the Company's investment policy is to only invest in fixed income securities.

A change of 50 basis points ("bps") (2023: 50 basis points) for financial assets interest yield across all portfolio consecutively would increase/(decrease) the market value of the financial assets and equity by the amounts as shown below. This analysis assumes that all other variables remain constant.

For the financial year ended 31 December 2024

19. Financial risk management (continued)

(a) Market Risk (continued)

(i) Interest rate risks (continued)

	✓ Increase/(decrease) →						
	2	2024	2	023			
	Profit before tax Impact on equity		Profit before tax	Impact on equity			
	\$'000	\$'000	\$'000	\$'000			
Cash							
- increased by 50 bps (2023: (50 bps))	166	138	39	32			
- decreased by 50 bps (2023: (50 bps))	(166)	(138)	(39)	(32)			
Financial assets at FVTPL							
- increased by 50 bps (2023: (50 bps))	(3,052)	(2,534)	(3,055)	(2,536)			
- decreased by 50 bps (2023: (50 bps))	3,109	2,580	3,114	2,585			

(b) Credit risk

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the Company. The major classes of financial assets of the Company are insurance receivables, reinsurance assets, investments in government securities and debt securities, cash and bank deposits.

Credit risk - investment

The Company is exposed to investment credit and price risk as a result of its holdings in fixed income investments. The investment guidelines seek to limit the credit risk of each of the portfolios through specifying eligible/ineligible investments; setting maximum counterparty exposures and minimum weighted credit quality and individual issuer credit quality.

Credit risk - insurance operations

The Company is exposed to credit risk as a result of its regular insurance and reinsurance activity. The areas of key exposure are:

- (i) reinsurers' share of provision for claims outstanding;
- (ii) debtors arising from reinsurers in respect of claims already paid;
- (iii) amount due from direct insurance and reinsurance policyholders; and
- (iv) amount due from direct insurance and reinsurance intermediaries

Ceded reinsurance is used to manage and mitigate inwards direct insurance and reinsurance risk. Ceded reinsurance does not discharge the Company's liability as primary insurer. If a ceded reinsurer fails to pay a claim, the Company remains liable for the payment to the policyholder.

For the financial year ended 31 December 2024

19. Financial risk management (continued)

(b) <u>Credit risk (continued)</u>

Credit risk - insurance operations (continued)

With regard to direct insurance and reinsurance receivables, the Company operates a credit control committee to review all outstanding receivables, a process for monitoring credit risk from insurance operations.

The Company manages its credit risk through brokers and reinsurers that have good credit history. The Head Office approves such reinsurers based on a credit worthiness with a minimum A rating by the rating agencies.

The maximum exposure to credit risk for each class of financial instruments is the carrying amount of that class of financial instruments presented on the balance sheet.

The credit risk for each class of financial instruments based on information provided to key management is as follows:

	Rating* (AAA to A)	Rating* (BBB to B)	Rating* (CCC to D)	Unrated	Total
	\$'000	\$'000	\$'000	\$'000	\$'000

^{*}Based on public ratings assigned by external rating agencies including S&P, Moody's and A.M. Best.

For the financial year ended 31 December 2024

19. Financial risk management (continued)

(c) Liquidity risk

Liquidity risk refers to the risk that the Company will encounter difficulty in meeting obligations associated with financial liabilities. To manage liquidity risk, the Company monitors and maintains a level of cash and cash equivalents to finance the Company's operations and mitigate the effects of fluctuations in cash flows. The Company maintains its investment in fixed income instruments which are easily convertible to cash whenever needed.

The table below analyses the maturity profile of the Company's financial liabilities based on projected undiscounted cash flows.

	1 year	2 years	3 years	4 years	5 years	More than 5 years	Total

(d) Capital risk

The Company's objectives when managing capital are:

- to comply with the insurance capital requirements as set out in the Insurance Act 1966, Insurance (Valuation and Capital) Regulations and also MAS Notice 133 (Notice on Valuation and Capital Framework for Insurers), including any subsequent revisions to the notice and regulations. In this respect the Company manages its capital on a basis of 120% of its minimum regulatory capital position. Management considers the current capital adequacy ratio of 258% (2023: 281%) sufficient to optimise shareholder's return and to support the capital required to write its business;
- to safeguard the Company's ability to continue as a going concern, so that it can continue to provide returns for shareholders and benefits for other stakeholders; and
- to provide an adequate return to shareholders by pricing insurance contracts commensurately with the level of risk.

In addition to other applicable regulatory requirements, insurers are required to maintain actuarial reserves under the Insurance Act 1966 to protect against the risk of adverse development in claims reserves in the future. The amount of the actuarial reserve is disclosed in Note 12.

For the financial year ended 31 December 2024

19. Financial risk management (continued)

(e) Fair value measurements

The following table presents the assets measured at fair value and classified by level of the following fair value measurement hierarchy:

- unadjusted quoted price in active markets for identical assets or liabilities (Level 1); and
- inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly (Level 2).

	Level 1	Level 2	Total
	\$'000	\$'000	\$'000
As at 31 December 2024			
Financial assets	15,355	353,238	368,593
As at 31 December 2023			
Financial assets	13,520	375,661	389,181

The Company uses pricing services to estimate fair value measurements for the majority of our fixed maturities. The pricing services use market quotations for fixed maturities that have quoted prices in active markets; such securities are classified within Level 1. For fixed maturities that generally do not trade on a daily basis, the pricing services prepare estimates of fair value measurements using their pricing applications, which include available relevant market information, benchmark curves, benchmarking of like securities, sector groupings, and matrix pricing. Additional valuation factors that can be taken into account are nominal spreads, dollar basis, and liquidity adjustments. The pricing services evaluate each asset class based on relevant market and credit information, perceived market movements, and sector news. The market inputs used in the pricing evaluation, listed in the approximate order of priority include: benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, bids, offers, reference data, and industry and economic events. The extent of the use of each input is dependent on the asset class and the market conditions. Given the asset class, the priority of the use of inputs may change or some market inputs may not be relevant. Additionally, fixed maturities valuation is more subjective when markets are less liquid due to the lack of market based inputs (i.e., stale pricing), which may increase the potential that an investment's estimated fair value is not reflective of the price at which an actual transaction would occur. The overwhelming majority of fixed maturities are classified within Level 2 because the most significant inputs used in the pricing techniques are observable.

For the financial year ended 31 December 2024

19. Financial risk management (continued)

(f) Insurance risk

The risk under any one insurance contract is the possibility that an insured event occurs and the uncertainty of the amount of the resulting claims. By the very nature of an insurance contract, this risk is random and therefore unpredictable.

The Company's operations are diversified by line of business and the geographic spread of risk. A global approach to risk management allows the Company to underwrite and accept large insurance accounts.

Clearly defined underwriting authorities, standards and guidelines are in place in the Company. Experienced underwriting teams maintain underwriting discipline through the use of pricing models, sophisticated catastrophe and risk management methodologies, and strict risk selection criteria. Qualified actuaries from the region work closely with the underwriting teams to provide additional expertise in the underwriting process. Centrally-coordinated reinsurance management facilitates appropriate risk transfer and efficient cost-effective use of external reinsurance markets. Reinsurers utilised by the Company must meet certain financial experience requirements and are put through a stringent financial review process in order to be pre-approved by the Head Office's Reinsurance Security Committee, comprising senior management personnel. As a result of these controls, reinsurance is placed with a select group of only the most financially secure and experienced companies in the reinsurance industry. Consistent approach to reserving practices and the settlement of claims are also ensured. In addition to these internal controls, the Company's operating units and functional areas are subject to review by the corporate audit team that regularly carries out operational audits.

The concentration of insurance risk before and after reinsurance by territory in relation to the major lines of business is summarised below, with reference to the carrying amount of the outstanding claims reserves and incurred but not reported reserves (gross and net of reinsurance):

Territory	Territory		General liabilities	Accident and health	Fire	Others	Total

(g) Offsetting financial assets and financial liabilities

The Company has a legally enforceable right to set off the intercompany balances with one of its related company and intends to settle on a net basis. The following table presents the recognised financial instruments that are offset as at 31 December 2024 and 31 December 2023.

	Related amounts set off in the balance sheet				
	Gross amount - financial assets	Gross amount - financial liabilities	Net amount - presented in balance sheet		
	\$'000	\$'000	\$'000		
As at 31 December 2024					
Other liabilities	15	(128)	(113)		
As at 31 December 2023					
Other liabilities	5	(360)	(355)		

For the financial year ended 31 December 2024

20. Related party transactions

In addition to the information disclosed elsewhere in the financial statements, the following significant transactions took place between the Company and related parties during the financial year at terms agreed between the parties:

(a) Sales and purchases of services

	2024	2023
	\$'000	\$'000
Immediate holding company		
Premium income	10,322	11,221
Commission expense	(13)	(12)
Claims paid	(460)	(717)
Premiums ceded	(16,211)	(19,760)
Commission received	(2,731)	2,080
Claims recovered	2,351	1,270
Other related parties		
Premium income	85,699	63,854
Commission expense	(8,246)	(5,283)
Claims paid	(18,433)	(17,592)
Premiums ceded	(212,942)	(198,221)
Commission received	70,258	66,719
Claims recovered	63,787	67,497
General expenses billed to related companies	682	193
General expenses allocated by regional office	(20,707)	(19,737)
Information processing expenses billed by a related company	(9,407)	(8,253)
Service fees billed by related companies	(4,660)	(3,146)
Service fees billed to related companies	171	192

(b) Key management personnel compensation

The key management personnel compensation includes salary, bonus and other emoluments (including benefits-in-kind) computed based on the cost incurred by the Company and when the Company did not incur any costs, the value of the benefits.

Key management personnel compensation is analysed as follows:

	2024	2023
	\$'000	\$'000
Salaries and other short-term employee benefits	4,758	4,637
Share based remuneration expenses	228	205
	4,986	4,842

For the financial year ended 31 December 2024

21. Dividends

	2024	2023
	\$ '000	\$'000
Ordinary dividends paid		
Final dividend paid in respect of the previous financial year	62,400	19,500

At the Annual General Meeting on 24 June 2024, a final dividend of \$34,600,000 was declared to be paid out of the profits of the Company, in respect of the financial year ended 31 December 2023 to ACE INA Overseas Insurance Company Ltd.

On 2 December 2024, an interim dividend of \$27,800,000 was declared and paid out of the profits of the Company, in respect of the financial year ended 31 December 2024 to ACE INA Overseas Insurance Company Ltd.

22. Critical estimates, judgments and errors

The financial statements for the year ended 31 December 2023 have been restated due to the following classification errors.

Computer software were erroneously presented as Property and equipment

The Balance sheet as at 31 December 2023 and 1 January 2023 have been restated to reclassify computer software to intangible assets from property and equipment. Intangible assets of \$9,149,318 as at 31 December 2023 and \$8,262,734 as at 1 January 2023 have been erroneously presented under property and equipment.

Impact of restatement to the Balance Sheet are as follows:

Assets	As of 31 December 2023 (\$'000)				
Assets	As previously stated	Reclassfication	Restated		
Property and equipment	12,038	(9,149)	2,889		
Intangible assets	64,660	9,149	73,809		

Assets	As of 1 January 2023 (\$'000)		
	As previously stated	Reclassfication	Restated
Property and equipment	11,669	(8,262)	3,407
Intangible assets	71,762	8,262	80,024

In addition to the above, certain prior year comparatives have been reclassified to conform with current year's presentation.

For the financial year ended 31 December 2024

23. New or revised accounting standards and interpretations

Below are the mandatory standards, amendments and interpretations to existing standards that have been published, and are relevant for the Company's accounting periods beginning on or after 1 January 2025 and which the Company has not early adopted:

Description	Effective for annual periods beginning on or after	
Amendments to FRS 21: Lack of exchangeability	1 January 2025	
Amendments to FRS 109 and FRS 107: Amendments to the Classification and Measurement of Financial Instruments Annual Improvements to FRSs - Volume 11	1 January 2026	
FRS 118: Presentation and Disclosures in Financial Statements FRS 119: Subsidiaries without Public Accountability: Disclosures	1 January 2027	

The new or amended accounting standards and interpretations above are not mandatory for 31 December 2024 reporting periods and have not been early adopted by the Company. These are not expected to have a material impact on the Company in the current or future reporting periods and on foreseeable future transactions.

24. Authorisation of financial statements

These financial statements were authorised for issue in accordance with a resolution of the board of directors of Chubb Insurance Singapore Limited on 30 April 2025.
