Technology risk and exposures

Technology companies face a broad range of first and third party risks as part of their day-to-day business activity. The graphic below groups these risks into five core coverage categories:

- Technology Professional Liability
- Reputational and Media Liability, and Infringement of Intellectual Property
- Privacy and Network Security Liability
- Cyber Security
- Public and Product Liability

- Financial loss arising from a product or service performance failure, including cover for performance based contractual liability, liability assumed in contract and any other civil liability
- Infringement of intellectual property rights
- Media risk including libel and slander or disparaging statements about another companies products or services
- Privacy and network security arising from liability failure to secure computer systems or preserve the confidentiality of personal or corporate data
- Regulatory investigations or enforcement proceedings expenses, payment card compliance matters and where insurable, a related fine or penalty
- Third party notification, forensic remediation and regulatory costs incurred following a breach of your computer systems and data
- Reasonable and necessary expenses directly resulting from cyber extortion.
- Business interruption cover as a result of a cyber incident and costs or expenses incurred to remove malware and reconstruct data
- Bodily injury and property damage claims arising on your premises or out of the products and services you provide

- Extensions to the policy include:
 - betterment costs
 - contractually assumed incident response expenses
 - cyber crime
 - cyber telecom fraud
 - emergency incident response expenses
 - liquidated damages
 - loss of documents or data of others
 - mitigation extensions to prevent a claim:
 - fees and expenses for unpaid invoices'
 - product or services following a recall or replacement
 - product or services defect expenses
 - product liability crisis response expenses
 - product withdrawal expense
