

# Chubb Risk Consulting

## SERVICES FOR Natural Resources Industry Clients

The natural resources sectors are rapidly evolving and present significant risks. Companies rely on complex infrastructure in hazardous environments and must prioritize safety and business continuity. As consumer behaviors shift and technology advances, it's essential to fully understand risks and exposures. Chubb offers the insight, expertise, products, and services necessary for comprehensive insurance and risk-mitigation solutions, servicing the industry segments for nearly 40 years.

[Chubb Risk Consulting](#) crafts pragmatic solutions with our insureds and offers recommendations to help minimize loss potential. Employing a network of nearly

400 global risk engineers and more than 120 risk specialists, with decades of experience, Chubb's risk engineers take the time to understand each company to align service strategies with its business needs.

The [Chubb Risk Engineering Center](#) is fully equipped and staffed to deliver loss mitigation training across multiple lines of business and offers courses specifically tailored to address the unique risks faced by clients. The Center is dedicated to providing advanced and collaborative educational resources, ensuring clients can access the latest tools and knowledge specifically designed to manage their risks effectively.

## Workers' Compensation

Hydrogen Sulfide (H2S) Awareness Training	Qualitative & Quantitative Industrial Hygiene Assessments	Job Hazard Assessments
Machine Guarding Assessments	Partnership with JJ Keller Solutions	Review & Development of OSHA or MSHA Programs
Safety Management Awareness	Safety Program Review and Development	

## Examples of Success Stories

<b>Renewable Natural Gas</b>	Chubb Risk Consulting performed infrared scans of critical electrical equipment across three anaerobic digestion facilities in the Midwest, resulting in numerous recommendations. Not only did the customer remediate these immediate issues, but took Chubb's recommendations to further expand their electrical preventative maintenance program across the remainder of their operational portfolio, helping reduce loss potential associated with electrical failure.
<b>Oil and Gas Lease Operator</b>	A lease operator in the Marcellus Basin requested driver training for their well tenders, with a focus on hazards specific to their geographic region. Chubb Risk Consulting was able to custom tailor a driver training session focused on those hazards associated within the Oil and Gas industry, specific to the Marcellus Basin. Chubb's knowledge of geographic and industry-specific hazards led to an effective training session, ultimately serving as new hire and refresher training for all company drivers.

## Lower Your Risk Today with Chubb Risk Consulting

Our team of world-class industry professionals is readily available to partner with your business and effectively mitigate any risks you may face. Contact our team below to explore how we can help you manage risks more effectively.
