Biotechnology businesses

Pharmaceutical manufacturers

Medical device manufacturers

Medical products distributors

Analytical laboratories

Research organisations

Healthcare information technology developers

# Premier Life Science claims scenarios

## Biotech Startup

The CEO and original inventor of a promising new cancer drug is seriously injured in a cycling accident, leading to a six-month absence from work. This raises concerns among investors about the company's ability to meet development milestones. The company engages a media relations consultant to conduct an investor roadshow and media campaign to reassure investors.

Chubb's **Crisis Response Expenses – Key Person** extension would cover the cost of the media relations consultant's services.

## Genetic Testing Company

A company offering a genetic lung cancer test is named as a co-defendant in a malpractice suit against a doctor using its service. The claimant alleges the doctor missed a cancer diagnosis, while the doctor contends the company delivered a false negative. An investigation revealed a labelling mix-up at the lab, resulting in the doctor receiving another patient's test results.

Chubb's **Healthcare Service** extension would cover defense costs and settlements arising from this litigation.

## Medical Device Manufacturer

A security vulnerability in the network protocols of an infusion pump is exploited by malicious hackers, enabling them to manipulate the infusion rates of several devices within a hospital. This leads to multiple patient injuries due to drug overdoses. The flaw is identified during an investigation, leading to a class action lawsuit against the manufacturer by the affected patients.

Chubb's **Cyber Liability, Bodily Injury, or Property Damage** extension would provide coverage for this litigation.

## Contract Research Organisation

A contract clinical research organisation is the victim of a data exfiltration event. This resulted in the theft of sensitive information, including results of several clinical trials conducted for its client. The data is subsequently made publicly available online. The affected clients initiate legal action against the CRO for failing to protect the proprietary data.

Chubb's **Intellectual Property Media Liability** cover would respond to cover defence costs and settlements resulting from this litigation.

## Why choose Chubb?

### Specialist Expertise

20 years' experience in Asia Pacific delivering expertise in underwriting, claims and risk engineering to life sciences businesses.
